leetcode.com/ChandlerGoneHigh

Software Engineer spanning full-stack development, backend systems, automation, AI and low-level computing

EDUCATION

•Birla Institute of Technology, Mesra

B.Tech in Artificial Intelligence and Machine Learning

2024 – 2028

CGPA: 8.59

EXPERIENCE

•CURRYiT | Shark Tank India-Funded Brand

Software Engineering Intern

Jun 2026 – Jul 2026

On-site, New Delhi, India

- Reduced daily operations effort by an estimated 3–4 hours and automated work equivalent to one team member by deploying 10+ internal finance, supply-chain and operations systems on a unified Next.js platform.
- Replaced manual PO verification and third-party document processing workflows with secure in-house automation, saving roughly 100 minutes per day across recurring purchase-order operations.
- Built workflows across Blinkit, Swiggy and Zepto, gaining hands-on knowledge of quick-commerce purchase orders, appointments, fulfilment, GRNs, reconciliation and marketplace data flows.

•Virtus Infotech | IT Solutions Company

Full Stack Engineer Intern

Sep 2025 – Feb 2026

Remote

- Developed reusable React and Next.js components across 15+ pages and built Node.js APIs, CMS modules and PostgreSQL-backed administrative workflows.

•Zulu Club | Quick-Commerce Fashion Platform

Automation & Backend Intern

Aug 2025 – Sep 2025

Remote

- Automated web scraping and CSV-processing pipelines for catalogue, order and operational data workflows.
- Integrated WhatsApp ordering flows with FTP storage and cloud-hosted backend services for business operations.

PROJECTS

•NeuralKernel | Interactive Demo

AI-Assisted Self-Built x86 Operating System

2026

C, C++, x86 Assembly, GRUB, QEMU, Next.js, v86

- Built a 32-bit x86 operating system from scratch with protected-mode booting, paging, heap management, hardware interrupts, Ring 3 userspace, ELF loading, system calls and preemptive scheduling.
- Designed lightweight fixed-point neural models that compute inference scores to classify processes and influence paging, scheduling and other kernel decisions.
- Developed a fast, on-device LLM-style conversational shell, custom filesystem and terminal environment; deployed the complete OS as an interactive browser emulator.

•Agex | AI Agent Marketplace Platform

Production Deployment

2025

Next.js, Prisma, PostgreSQL, Redis, Docker, AWS S3

- Built the backend for an AI agent marketplace with secure authentication, PostgreSQL data models, Redis-based job queuing, creator workflows and AWS S3-backed agent storage.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, C++, C, Java

Frontend & Backend: React, Next.js, Node.js, Express.js, REST APIs, TailwindCSS, Framer Motion, Three.js

Databases & Infra: PostgreSQL, MongoDB, Redis, Firebase, Supabase, Prisma ORM, Docker, AWS S3, Vercel, Render

AI / ML: PyTorch, TensorFlow, scikit-learn, NLP, Computer Vision, Transformers, LLMs, AI Agents

Automation & Tools: Playwright, Google Sheets API, Gmail API, ExcelJS, Postman, Git, GitHub, Linux, CI/CD

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

LEADERSHIP & ACTIVITIES

•Entrepreneurship Development Cell (EDC/E-Cell), BIT Mesra

Technical Lead

Feb 2025 – Present

- Built the E-Summit platform with registration, backend, database and admin-panel workflows, supporting 500+ registrations and concurrent event administration.
